Information For New Patients

Sutherland Eye Surgeons is located on Level 1 of 570 President Avenue Sutherland. Access to level 1 is via a lift. Our building is on the corner of President Avenue and Eton Street. We are within walking distance from Sutherland train station and bus interchange. Street parking is readily available with free 2 and 4 hour parking spots in nearby streets.

Please allow at least two hours for your first appointment, which will involve history taking and screening with one of our clinical staff, any necessary tests, then the consultation with your doctor. We recognise that your time is important, and we always endeavour to ensure our patients are seen in a timely manner, however, unforeseen emergencies can occur which could affect appointment schedules.

On the day of your appointment, you may have dilating drops put into your eyes which will make your vision blurry and more susceptible to glare. This may last for 2 hours or more and varies from person to person. It is therefore advisable to bring sunglasses with you and not to drive after your appointment.

Payment in full is required at the time of your consultation. We will then process your Medicare claim on your behalf (if you have a current referral). Please bring your referral, your Medicare card and private health insurance details with you to your appointment.
